Superintendent:

Dear Friends:

I take this opportunity to extend congratulations to the staff of the 1972 "Roar" for the fine job they have done in the preparation of this years annual. They have compiled many enjoyable moments and occasions that will be fondly remembered by those departing the New Deal Schools.

For those graduating seniors I extend congratulations for a job well done. I wish you much success in your chosen endeavors down life's paths. It is my hope these undertakings will be made more meaningful through your preparation made here at New Deal High School. The values you have gained through this preparation are the keys to success in all endeavors. May you use them wisely and find the true meaning of success.

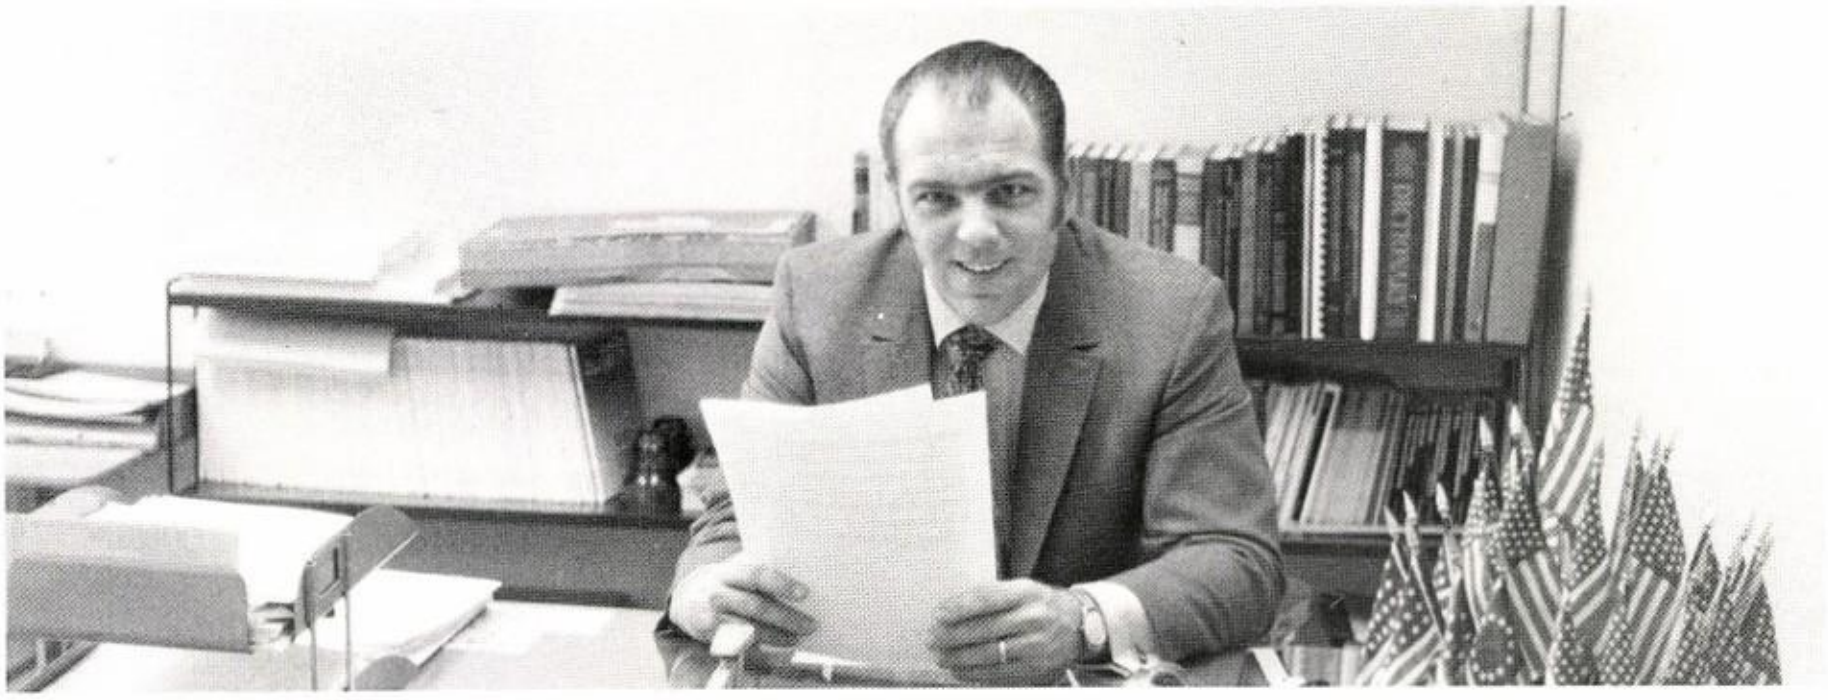
I challenge you to become more involved in the educational process, whether you are in school or out. This involvement continues to refine the goals and ideals you have set for yourself and for which you are striving. This provides the "second effort" necessary for their attainment.

Best wishes,

Foye L. Flood

Foye L. Flood
Superintendent

Principal:



Dear Students and Faculty of New Deal High School:

For those of us who are interested in New Deal Public Schools, this has been a banner year. I realize that all of you have contributed to this success and I want to extend my congratulations to you, the students and faculty, for the remarkable leadership you have provided, as well as to give my thanks for the enormous amount of work and interest you have put into your responsibilities. I think I speak for all of the constituents of our community when I say we owe you a debt of gratitude for the achievements of this year.

As we look ahead, there is no instant of time so favorable to us as is the present one. The past is history. Its final chapter has been written. Fortunately or unfortunately, of course, as the individual case may be, the past cannot be obliterated from our present or our future. Its infinite variety of experiences such as its successes and failures, its trials and tribulations, and we have suffered many this year, have been recorded in our personality and character. The person we are now is a composite of these experiences of our past.

Students, the future is yours if you will but take it and shape it into the successful and purposive one you want it to be. What you will be, you are now becoming! What you are is God's gift to you; what you make of yourself will be your gift to God!

Again, thanks for the memories and may your future bring you success and happiness.

Your friend,

W. T. Garland

Principal:

TO THE STUDENTS:

This year has been very rewarding to both the student body and to the faculty.

As students, you are now learning values and developing an attitude that will affect your lives as well as the lives of many others. Enjoy these years as students; but, guard them carefully. Do not let your many efforts go unguided and without purpose or goals.

As teachers, we think we have some of the best students that are to be found. We also see many characteristics among our students that speak of leadership, honesty, consideration, and citizenship. These qualities make us proud of you as students and as young Americans.

Sincerely yours,

Allen D. Gamblin

Dedication

"Remember Man That Thou Art Dust
And Unto Dust Thou Shalt Return"

With this thought in mind, we, the members of the 1972 annual staff would like to dedicate the "ROAR" to the memories of our teachers, classmates, and friends - Mr. Humphrey, Doyle Hartless, James Hartless, Mrs. Vaughn. Each of these individuals held a lasting significance in the hearts of many. New Deal High School, its administration, faculty, and students will remember them always.

GAS WILL POWER THE FUTURE

Imagine a small cabinet-size unit in your home that produces all the electricity you need. Well, such silent, efficient Gas fuel cells already exist and have proved themselves in actual operation. They are the same in principle as those now powering our spacecraft. Research is proving that the most economical way to produce energy is to convert piped Gas at the point of use. But that isn't surprising because Gas is almost pure energy.
